1. Our Solutions

II consists of a highly motivated and dedicated Systems Integration team. We refer to this team as our "Solution Center Network". Our network consists of empowered, successful resources providing quality solutions to meet many facets of our customer's application development needs. Each resource possesses exemplary skills in a node, or set of nodes, within our solution network.

II Solution Center

Our center is organized similar to the medical profession. The medical profession maintains specialists to address a patient's particular physiological needs. Our specialists possess skills that address our client's particular information technology needs. These skills are not always technical or product specific, but based on pure conceptual information technology methods. We take pride in our vast knowledgebase, and believe this is the best approach to stay abreast of rapid advances in technology.

II clients operate in numerous industries. Our clients have the common characteristic of making aggressive investments in technology to maintain industry leadership. Follow the navigation links that highlight our success.

Warning:

Due to certain client confidentiality requirements we may not be able to mention them, or provide specific information about techniques used.

2. Consolidated Intranet - Workplace Integration Portal

Consolidated Intranet - Workplace Integration Portal

Business Objective: Facilitate integration of communication and business operations. See the [project summary](#).

3. An energy distribution and services corporation

An energy distribution and services corporation

Business Objective: With the enactment of the Sarbanes-Oxley Act our client was in need of application integration and administration skills that were compliant with Sarbanes-Oxley Act. See the [project summary](#).
